

Global Hydraulic Presses

40t Hydraulic press

Hydraulic presses have a large area of application in the woodworking industry. They are used for the fabrication of curved and shaped plywood parts like chair shells, kitchen and furniture components, where high production output is needed.

However, this not only applies to woodwork applications. Hydraulic press technology is also an ideal tool for thermoforming Solid Surface materials (Corian®, HI-MACS®, Krion®, PLEXIGLAS® Mineral, etc.), especially for pressing complicated and deep 3D shapes like hand basins, sinks and shaped 3D components with extremely small radii.

Global hydraulic presses consist of height adjustable bed plates by means of a reducer, a powerful motor, a front opening up to 100-900 mm, hydraulic pressure adjustment and control panel with optional foot pedals for hands free working. Global Hydraulic presses are powerful tools for woodworking and thermoforming and are ideally suited to press deep 3D shapes, small radii, or simply where rapid and high production output is necessary.

Product information

- ▶ For woodworking and 3D thermoforming
- ▶ Adjustable hydraulic pressure, max. 200 bar
- ▶ Including bed plates
- ▶ Custom sizes available
- ▶ Designed to press complicated and deep 3D shapes
- ▶ Cylinder stroke 200 / 250 mm
- ▶ Adjustable bed plates to different heights
- ▶ Electrical connection 380 V / 50 Hz / 3~

Code	Bed plates	Front opening	Press capacity	Cylinder speed	Power requirements
GHP-P-0806	800 x 600 mm	100 - 900 mm	40T	8 mm/s	3.0 kW
GHP-P-1306	1300 x 600 mm	100 - 900 mm	40T	8 mm/s	3.6 kW
GHP-I-0807	800 x 700 mm	250 - 500 mm	40T	8 mm/s	3.0 kW
GHP-I-1708	1700 x 800 mm	250 - 500 mm	40T	8 mm/s	4.0 kW

Conditions

Delivery time: 4 Weeks
 Shipping: Ex Works 46113 Moncada, Spain
 Warranty: 2 Years under normal use
 Technical characteristics reserved to change without notice.
